

Acquisition Brief — postquantique.fr

Domain name / Asset offered: postquantique.fr (*single asset; no other extensions included*)

Purpose: acquisition of a **strategic banner** for **post-quantum migration (PQC)** — crypto inventory, replacement paths, key governance, sourcing & partners — led by **CIO/CTO/CISO**.

This document — who it's for, why

Decision-grade brief for **CEO / COO / CFO / CTO / CISO / Compliance** (finance, industry, health, public sector, critical operators).

Thesis: **using the exact category name** provides operational and reputational edge.

POSTQUANTIQUE.FR is a neutral, memorable banner to mobilise **Executive, IT, Security, Procurement** and the **PQC** ecosystem.

1) One-page decision

What it is. A descriptive .fr asset for post-quantum migration: a public portal, references and resources.

Possible use. An entry point for program documentation and contacts.

Example program. Cryptographic and dependency inventory, scope prioritization and a project-specific migration roadmap.

- **Resource center.** Replacement-algorithm matrices, PKI/key policy templates, sourcing & integration guides.

- **Ecosystem voice.** Primers, milestone calendar, sector use cases.

Why it's defensible. Exact French term + .fr.

2) Context & milestones

Context: partner and client expectations, PKI renewal, governance and traceability.
Migration timing depends on the scope concerned.

3) Three possible deployments

A. FR/EU enterprise (PQC program). Document inventories, migration paths and approvals.

B. Security vendor/integrator. Present an offering and its resources.

C. Alliance/institution. Share references and requirement profiles.

4) Strategic edge of the asset

C-level clarity. **Defensive** (exact FR + .fr). **Re-use** of content, kits, connectors, relationships.

5) Market size & pressure

2025–2032: rising **crypto-migration CAPEX/OPEX** (inventories, integrations, keys/PKI, audits). Buyers need a **narrative standard** and a **visible hub**; **POSTQUANTIQUE.FR** provides both.

6) CFO anchors (obligatory)

6.1 Awareness & adoption. Communications and change management are project-specific. No avoided cost is estimated.

6.2 Project schedule. Timing and cost depend on scope and organization.

6.3 Shared resources. The domain can group documentation and contacts.

7) Investment logic (no public pricing)

SEO & memorability. **Strategic premium** (language + 2025–2028 window). **Budget lens:** a **single asset** beats scattered campaigns/change.

8) Related assets / bundle option (≤ 2)

- **quantique.io** — FR/EU quantum hub (watch, use cases, partnerships). (*add-on, not included*)

9) Clean acquisition process (Legal/Finance)

Scope of sale: postquantique.fr only.

Escrow, fast transfer, invoice. Options: **cash / 40-30-30 stagger / bundle**; **NDA** & audit available.

Legal notice: descriptive name, **no affiliation**.
